SWISS SLEEP

THE BOXSPRING BED IN URBAN CHIC.

Slow

# Slow

Slow is the name of the enticing SlowTech Boxspring bed from riposa. It skilfully combines modern urban style with a smart SlowTech lightweight design. All of the materials are intelligently combined, giving the bed its clean, sculptural appearance. The Slow is created and manufactured with the greatest care in our development and craft studio in the Glarus region.

## Lightweight design

With the Slow, we consistently combine the SlowTech design with the latest Swiss Sleep Technology (SST) engineering. The result is a bed unit with a lightweight-looking but highly stable wooden construction. The embedded pocket springs gently absorb the movements of the upper bed. The Slow sets new standards in terms of material composition, lightness and spring comfort.

## SlowLiving look

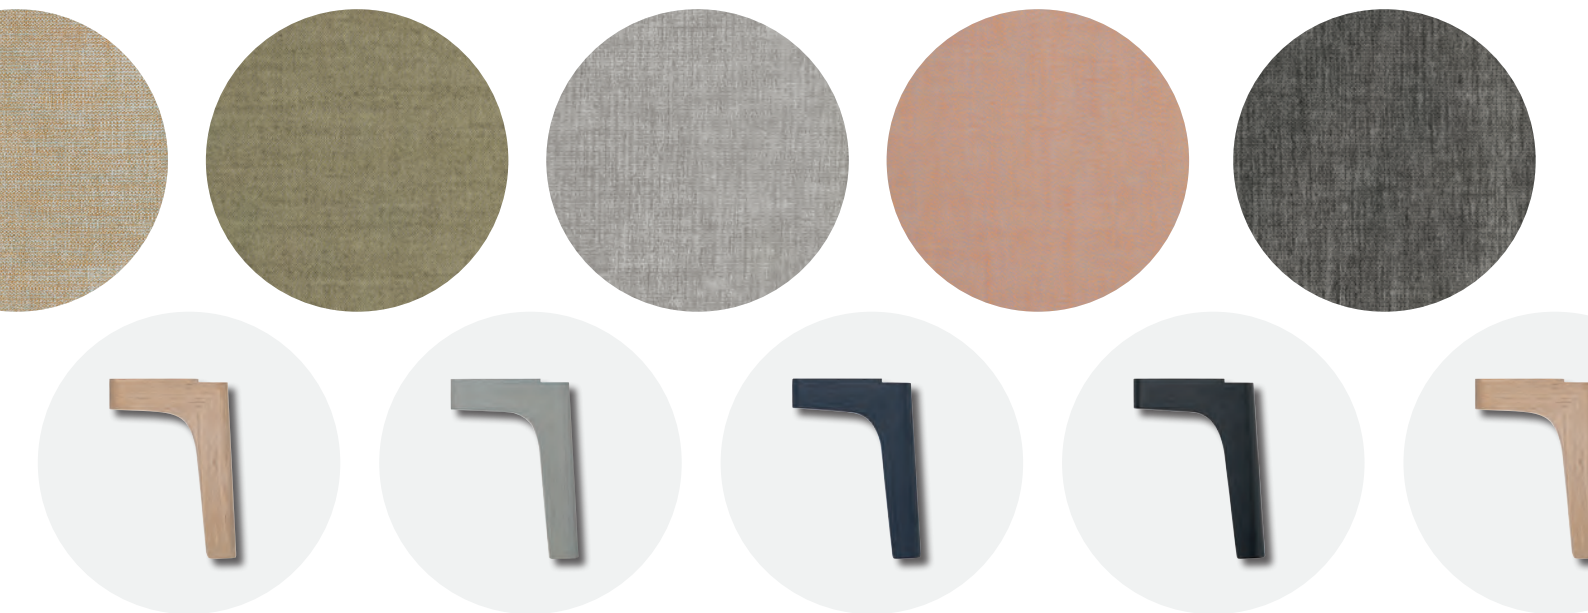

The finely balanced proportions and the urban design language make the Slow a real eye-catcher.

## Dress Change

The padded cover on the Slow bed unit and headboard is removable. If you fancy a new look, simply select a different cover (Dress Change).

# Your unique piece.

Turn your Slow into a truly unique piece – from the construction to the fabric colour.

The choice is yours.

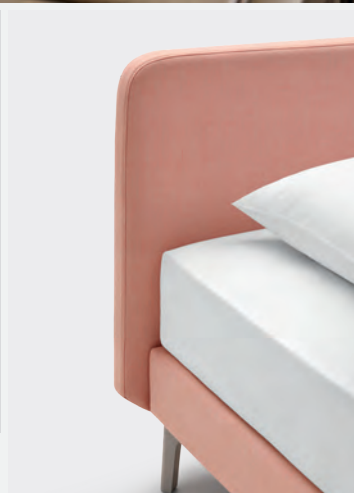

You can choose from over 70 fabrics and leathers in a wide range of colours and structures from the various riposa collections. Combine them with solid wooden feet in Wood Light, Night Blue, Grey or Black and customise the Slow to create your very own unique model.

# Studio.

Our Boxspring studio in the Glarus region.

In our Boxspring studio in Oberurnen we produce exclusive Boxspring unique pieces every day – each bed bears the personal signature of an experienced employee. Thus the traditional profession of upholsterer, which had almost disappeared in Switzerland, lives on at riposa. Today we are also training new upholsterers in our studio.

riposa Swiss Sleep is an investment  
in your health – developed with  
experience and innovation,  
manufactured in Switzerland.

Special sizes on request.

# Technical data & finished size

## Slow – technical data

### STRUCTURE

The stable wooden construction in the lightweight Slow-Tech design forms the basis of the bed unit. The embedded pocket springs gently absorb the movements of the upper bed. This ensures optimal lying and spring comfort. At the same time, Swiss Sleep Technology (SST) engineering sets new standards in terms of material composition, lightness and Boxspring technology thanks to the SlowTech design.

### REMOVABLE MATERIALS/DRESS CHANGE

The high-quality covers are removable (headboard and bed unit) and can be exchanged to give the bed a Dress Change.

### ANTI-SLIP SURFACE

The Slow is equipped with a breathable anti-slip surface.

### FEET

The solid wooden feet are available in four colours: Wood Light, Night Blue, Grey and Black. This allows you to fully customise the look of your Slow bed depending on the colour of the cover.

### HEADBOARDS

Two headboard sizes are available for individual bed compositions: the classic standard height and a higher «Long» version.

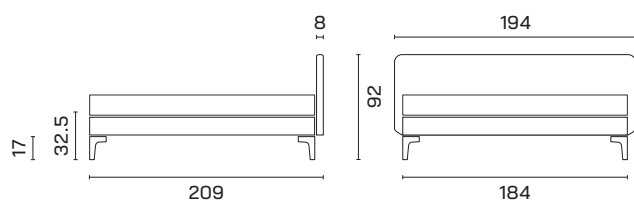

**Please note:** the Boxspring beds from riposa are manufactured entirely by hand with care and craftsmanship. Slight sizing differences may therefore occur.

## Finished size of model 180 × 200 cm

All sizes in cm

### Slow Boxspring bed

#### «Standard» headboard

#### «Long» headboard Ideal for combining with a high mattress or mattress with topper.
